TRIPAX
ENGINEERING CO. P/L

■ NEW LOGO AND WEBSITE

Tripax has in conjunction with our parent company, Jorgensen Engineering, introduced a fresh new look. As part of this look a new logo and website has been launched this week. Our new website and logo gives a more accurate representation of Tripax – one of the leading manufacturers to the food industry in Australasia.

Please have a look at the new website www.tripax.com.au and let us know what you think.

Tripax Engineering Co P/L
64 Barry Street
Bayswater Vic 3153

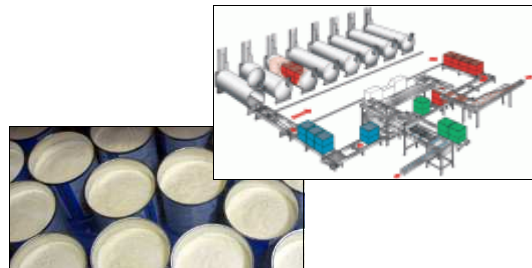

Our focus...

■ PACKAGING HANDLING

The new logo is also to be seen as a strengthening of the Jorgensen Group. As we reported in our last newsletter Tripax represents our sister company brüel international with bin and crate washing solutions in Australasia.

We also work with our parent company, Jorgensen Engineering, to supply the best solutions for **packaging handling** by sharing our IP. Solutions are tailored to each customer and based on the technology developed for the European market.

The product range includes **loading/unloading systems** for retorts as well as **lines for milk powder and SCM** with any sort of packaging – incl. **cans, jars, alu trays, pouches etc.**
