50 Years In And Still Going Strong

New Products

Fonterra have taken delivery of a newly developed double chambered cheese shredder.

Having both manual and automatic feed options this new shredder is capable of shredding 2 x full 20kg blocks at a time. Capable of shredding rates in excess of 5000kg per hour this machine is in a league of its own.

Exciting News at Tripax

There has been a few changes and new staff members at Tripax.

As many of you are probably aware Chris Jorgensen has headed back to Denmark after 5 years with Tripax and Julie Taylor has decided that she needs a change after 20 years.

We all wish them well on there future endeavors.

Peter Ulrikkeholm has joined the team at Tripax as our new managing director, joining us from our parent company Jorgensen in Denmark.

Peter joins us during an exciting time in Tripax's history as business is doing well with several good

projects on the books and a lot of new products coming through development.

To cope with this workload and ensure that our customers are serviced properly our salesman Terry Bronstring has stepped into the role of sales manager and a new member of the team Mr Brian Power joins us as an additional salesperson. Brian comes to us with extensive experience in customer service and the materials handling industries.

New Tripax baby leaf washer

The last 12 months we have been developing a new washer expanding our range of washing equipment.

Many of you would be familiar with our vortex washer range. Now we have a baby leaf washer.

Utilizing aerated water to provide a gentle agitation to delicately wash leafy product.
