Construction

Made to Food Industry Standards, using stainless steel construction and incorporating food grade plastics, belting, pumps etc. Safety is paramount with safety guards and switches installed wherever necessary. Robust construction for many years of trouble free life. Hygienic design with easy cleaning is foremost in our design process

Designed to suit your requirements

Our experienced design engineers will take your idea or individual process needs and individually tailor equipment and processes to suit your requirements.

We understand that no two processors are exactly the same and we take great care to ensure that we offer the most practical and cost effective solution for you.

Our equipment constantly evolves as new technology becomes available. This ensures our customers receive the most up to date equipment that can be purchased anywhere in the world!!

Experience and commitment

With over 30 years in the business of machine development and manufacture we can offer a complete service from design to commissioning on your specific project!!

From a single stand alone piece of equipment to an entire line - a phone call to our sales office will assist in getting your project off the ground
