

# Bin tipping

## Tipping and stacking system

➤ Capacity: 40 bins per hour ➤ Product: Chep crates/bins

### Machine Description:

Full bins are loaded by forklift onto the receival bed. The bin will move into the tipping frame when the previous bin has exited.

The bin is lifted, tipped and emptied and returned to the bed to continue to the stacking frame.

The previous bin is lifted up and the new bin moves underneath until a stack of three bins is achieved.

The stack is removed all at once by forklift. The operation is automatic and controlled by PLC to suit your particular needs.

Made from stainless steel and food grade materials to a robust design for a long trouble free life.
