

Cutting

Baton cutter bench top model

- Product: potato, carrot, tomato, beet, turnip, zucchini etc..
- Capacity: 100—300 kg per hour

Machine Description:

This machine will give a high quality, clean cut from peeled product.

Cut sizes available

5.5 mm to 15 mm plus 4,6 and 8 wedge segments

The product to be cut is placed in the chamber. Whilst closing the lid, the product is pushed through a knife block by pneumatic piston. The lid is then manually opened and the chamber re-loaded with product.

The ram will only operate when the lid over the product chamber is closed.

Max. diameter of product—65 mm

Max. length of product—140 mm

Cutter heads are easily detachable from the machine making changes of cut size and cleaning very easy and without the use of any tools.

Manufactured from stainless steel, aluminium and high density polyurethane.
