

Elevating

Vertical Elevator

➤Capacity: 16 tonne per hour

➤Product: carrots, root vegetables

Machine Description:

This elevator is used for conveying product from one height to another with the smallest footprint possible.

The belt is a cleated solid polyester belt carrying the product from the infeed chute at the bottom of the conveyor, and discharging it at the out-feed chute at the top.

The belt is enclosed by stainless steel panels giving a 'clean' movement of product with minimal noise.

Product can be accumulated in the infeed hopper for continuous process.

Made from stainless steel and food grade materials to industry safety standards.
