

Length grading

Vibratory grader for beans

➤ Capacity: 3 tonne per hour ➤ Product: beans

Machine Description:

The beans are fed onto the vibratory pan and travels over 6 grading stations.

Each station consists of a number of fingers situated in the same direction as the product flow over an adjustable opening across the pan.

Small pieces of product, dirt, debris etc. will fall through the openings whereas longer, acceptable product will travel over the fingers to the vibratory pan outlet.

Made of robust stainless steel materials to food industry standards. Associated equipment available.
