

Length grading

Vibratory grader for carrots

➤Capacity: 16 tonne per hour ➤Product: carrots

Machine Description:

Product is fed onto the vibratory pan and is aligned length-wise by means of channels that the product slides into by the agitations of the vibrating pan.

The carrots travel over 2 grading stations. At each station an adjustable opening

allows short or unwanted small pieces of carrot to fall through the opening whereas longer acceptable product will travel over these openings and over the vibratory pan discharge.

The discharge outlet can be divided into two sections for distribution to two separate lanes for further processing.
