

Mixing

Mixer for pallet bins

- Capacity: max. weight 600 kg
- Product: cut vegetables, salads, dried fruits, nuts etc,

Machine Description:

The full pallet bin is conveyed into position from the front of the mixer by a slat conveyor.

The bin is lifted by means of fluidic muscles and locked into position in mixing chamber / hood.

The bin is rotated (can be rotated both

directions) until the desired mix is achieved.

The bin is then lowered back to its original position for conveying out of the rear of the mixer making way for the next pallet to be fed in from the front.

(making the system a continuous process)

All stainless steel construction, heavy duty components and built to food industry standards. Other complimentary equipment available.
