

# Peeling

## For pumpkin

➤ Product: pumpkin segments.

### Machine Description:

The machine consists of a peeling disc which rotates anti-clockwise by drive of an electric motor. By holding the pumpkin segments firmly with two hands the operator can apply the peel surface against the peeling disc area.

Whilst slowly rotating the segment you will notice the peel shredding away very quickly and easily.

Peel waste is discharged from underneath the machine.

A clear plastic shroud is provided to prevent product from being sprayed around.

The machine is constructed from stainless steel with a glass beaded finish.

Power requirements: 240V single phase
