

Tumble drum

For coating product

➤Capacity: up to 1500 kg per hour ➤Product: cheese, other coating needs

Machine Description:

Product enters tumble drum and whilst being tumbled by the rotating drum, is coated with desired coating / powder distributed by a dispenser.

The drum is on an decline so product travels to the discharge point

under gravity.

Smooth and quiet running is assured with the use of nylon trunnions.

Manufactured from stainless steel materials to food industry standards.

Powder dispensers available to suit application.
