## Barrel emptying and de-brining arrangement

➤ Product: olives, pickles, tomatoes, cocktail onions etc.

### Machine Description:

The barrels are first de-brined and then lined up on a roller conveyor, single file, for the tipper.

The barrel is secured into the tipping cradle and the barrel is tipped and emptied into a hopper. A cleaned elevator feeds the product at

an even rate from this hopper to a tank filled with water.

The product laden water is then pumped to the bottling station for dewatering and bottling.

All the machinery is made in stainless steel for long trouble free life.

Other applications available.
