

Vibratory Settling table

➤ Product: any item that requires settling in boxes

Machine Description:

This machine is designed to settle product in a box or tub by a gentle vibrating motion.

The table is usually situated at the discharge end of the feeder where the packing of product takes place. Manual 'top-up' of product can take place during the settling process if required.

The box guides are adjustable to hold various

size boxes securely.

The machine is a stand alone machine complete with start / stop push button and isolator switch. The 4 pneumatic springs require air of minimum .5 bar and maximum 3 bar.

Made of stainless steel and food grade materials for a long, trouble free life.
